## KENYA NATIONAL PARKS

### REPORT OF THE TRUSTEES FOR 1964/1965

1. The period covered by this Report is the first full year's work of the Trustees appointed under the Kenya National Parks Act as amended by the new Constitution. The Trustees have been faced with many problems, particularly that of having to operate with limited finances. This has restricted the development necessary to keep up with the ever-increasing number of tourists and local residents who wish to visit our Parks. However, good progress has been maintained throughout the year and we are proud of our contribution to the great work of "building the nation".

2. The weather has not been altogether too kind during the period for after only reasonably good short rains the long rains in April and May were practically a total failure. However, we can consider ourselves luckier than in many other parts of the country where the drought was the worst known for many years. Bush fires which are, of course, the greatest danger during long dry periods, particularly in the Tsavo Park, were kept well under control. This was made a great deal easier by the use of the Super Cub aircraft, used in the role of spotting and directing fire-fighting parties without delay to the effected areas.

3. We are most grateful for the help and cooperation we have received from the Minister for Natural Resources and Wildlife and from his officers who have spent much of their valuable time attending our meetings and travelling around the countryside advising on new projects. We are also most grateful for the assistance we have received from the University College, whose officers have always shown their immediate willingness to help us in the scientific field, and who have taken such an interest in our general affairs. To the East African Wild Life Society we would like also to offer our grateful thanks for their ever-ready assistance.

4. The Board met four times during the year and the Executive Committee ten times. In order to acquaint the Trustees with work in the field and for them to have the opportunity of meeting the staff and discussing their problems, one full Board meeting was held in the Tsavo Park at Kilaguni Lodge and another at Nyeri in the Mountain Parks. These meetings were highly successful and served a most useful purpose of liaison between the Trustees and their executive.

The Chairman also paid personal visits to all Parks during the year to discuss matters of importance with the staff.

5. In accordance with the Government policy of Africanisation, a Deputy Director (Supernumerary), Mr. Perez Olindo, was appointed in April to understudy the Director with a view to taking over the post. Mr. Olindo, who was serving with the Game Department, has a degree in Zoology and Wildlife Management. Assistant Wardens Elisha Samuel and Hassan Said were promoted to the rank of Warden and sent on a two-year course to the College of African Wildlife

Management at Mweka in July. Mr. Silas Murithi was appointed Assistant Warden in the Education Centre with a view to taking over the post of Education Officer, and Mr. Philip Mulandi was promoted to the rank of Junior Assistant Warden in the Nairobi Park.

6. We wish here to express our grateful thanks to the Director and his staff for their loyal and hard work during the period under review.

7. We have to record with much regret the tragic and untimely death in January of Mr. Donald Taylor who was lent by the courtesy of the African Wildlife Leadership Foundation to organise and start the Education Centre. His place was taken by Mr. Lloyd Sherman. The Education Centre was officially handed over by Judge Russell Train, President of the African Wildlife Leadership Foundation to the Hon. S. O. Ayodo, Minister for Natural Resources and Wildlife on January 27th. The ceremony was a marked success and the Trustees at their next meeting passed the following resolution:—

“IT WAS ACCORDINGLY RESOLVED that the Trustees formally record their acceptance of these fine buildings which now become part of the assets of the Nairobi National Park. They express their extreme gratitude to the African Wildlife Leadership Foundation, confident that this Education Centre will be a valuable addition to the National Parks, particularly in relation to the preservation of the Parks for posterity”.

The value of education in wildlife is fully appreciated by the Trustees, and since the opening ceremony the Centre has progressed most favourably. Many groups of children and students have received instruction in the form of lectures, film shows and tours of the Orphanage and the Nairobi Park. Their enthusiasm is proof enough of the importance of the Centre. It is hoped in the future to build a hostel nearby so that concentrated instruction can be given to the more promising groups of students.

8. As can be seen in the appendix, slightly more people visited the Parks than in the previous period. This is most encouraging as it was assumed that there would be a considerable drop due to the withdrawal of the British Forces in December, 1964. The fact that the Nairobi Park figures have dropped is probably due to this, but it is largely compensated by the increase in season tickets taken out for this Park.

There is no doubt that the interest generally in wildlife conservation and particularly in our Parks is increasing at a great pace and is not confined only to overseas visitors. Local interest and participation is very keen and plans are in train to provide cheaper accommodation and travel facilities to enable those local people who do not possess motor cars to visit the Parks. The plans include the construction of ‘Dormitories’, which will cater for groups of people and students who are not able or willing to pay hotel charges. With the increase in visitors and vehicles, the animals have become far less timid and noticeably

easier to view compared with a year or two ago. This is particularly so in the Nairobi Park.

9. Lodge development has been disappointing and little extra accommodation has been built in any of the Parks. This has been due largely to financial considerations, but plans are going ahead for the expansion of Kilaguni Lodge by another 42 beds and this should be completed early in 1966. Kilaguni has proved a great success and is now probably as well known throughout the world as Treetops. Plans are also in hand for tented camps to be erected in both Tsavo East and Tsavo West Parks. This, however, is only a palliative to the whole solution as camps are not really what the average tourist requires. Aruba Lodge expanded a little by building in the verandahs of each banda, making an extra room. This has only been partially successful.

There is no doubt that there is a great need for more lodge accommodation in both the Tsavo Parks and on the Aberdares. Sites have been selected and work could go ahead provided funds were forthcoming.

Kitani (do-it-yourself) Lodge has not been particularly well patronised and its occupancy rate has only just exceeded twenty per cent over the period. However, it is not thought to be wise to change the Lodge's status as it caters for the local resident and the charges are moderate. Plans are therefore going ahead to improve the accommodation without altering the charges and to give more publicity to the whole project.

10. Legal complications are still holding up the completion of the handing over of Donyo Sabuk Mountain and the northern part of Lake Nakuru to National Parks, but we hope to be able to report a successful conclusion to these long-drawn-out negotiations in the near future.

The future of the Shimba Hills is still in the balance and is further complicated now by the fact that the Forest Department require a large area near Mombasa for a soft wood plantation. However, it is hoped that an area outside the Shimba Hills can be found, as there appears to be a very good chance of funds being made available from outside sources to acquire this fine area as a National Park.

Agreement has been reached to take over certain forest areas in the Aberdares and Mount Kenya. These areas will make a most valuable addition to the Parks and surveys are being carried out.

A Sub-Committee was appointed to examine the possibility of taking over other areas and we have to report as follows:—

(a) *Mount Elgon*

Subject to settling the boundary of the proposed National Park below the Endeless Bluff, sufficient agreement has been reached and negotiations are proceeding.

(b) *Lake Rudolf*

The intentions of the people relative to the Ileret area are not yet clear, but negotiations are proceeding to try and agree on an area on the eastern shore of the Lake.

(c) *Marsabit*

Negotiations are proceeding and, subject to the solving of a small problem concerning forest produce for the local inhabitants, it should be possible to proclaim a National Park on the upper reaches of the Mountain.

(d) *Wills' Farm, Naivasha*

Early in the year Mr. Wills presented his farm of 500 acres on Lake Naivasha to the National Parks. The Trustees have accepted this generous gift and negotiations are in progress to exploit the wildlife potential of the whole area.

11. We are happy to report that poaching within the Parks has been kept to a minimum during the period. This has been due largely to the fine efforts of the Ranger Field Force in the Tsavo and Mountain Parks, and also to the use of aircraft by the Wardens. A potential danger, however, lies in the area of the Aberdares adjacent to the Park. It is hoped that a concerted effort by the Game Department and ourselves in the near future may put this matter right.

12. The problem of excess elephants in the Tsavo East Park has been studied by a special Committee appointed by the Trustees. It has just been learnt with great pleasure that the Ford Foundation have donated a large sum of money for research into this difficult problem and this will indeed be of great assistance to the Trustees in helping them to reach satisfactory conclusions.

13. Early in the year we acquired a new Cessna four seater aircraft. The purchase of this aircraft was made possible through the generosity of Mr. Bonar, to whom we are most grateful. We have also the promise of another Super-Cub which is to be financed by the East African Wild Life Society and the World Wildlife Fund. These aircraft have been proved absolutely invaluable and undertake all kinds of important work. Six members of the staff are in possession of Private Pilot's Licences.

14. We are most grateful to the National Youth Service for their cooperation and hard work in the Nairobi and Tsavo East National Parks. They have been employed on road work, bridge building and bush clearing and have always worked most willingly and cheerfully.

15. The following gives in more detail the year's important happenings in the various Parks:—

### **NAIROBI NATIONAL PARK**

16. The Nairobi National Park has had an excellent year. As previously stated, the game in this Park are becoming more accustomed

to vehicles and viewing is excellent. The Bush Buck, normally very shy, can be seen daily in the Forest area and can probably be seen better in the Nairobi Park than anywhere else in the country.

17. We report with regret the retirement of Mr. Stephen Ellis, Warden of the Nairobi Park for twelve years, who had to return to England for personal reasons in early 1964. He had done a great deal to build up the Park to its present standard. His place was taken by Mr. Dennis Kearney.

18. The Orphanage has had a tremendously successful year with an increase of nearly 50,000 visitors compared with the previous ten month period. One feature of the Orphanage has been the increased number of organised school parties. The children have, whenever possible, been escorted by a member of the Parks' staff, who has been able to educate them to the various species of animals. This surely will have a lasting effect and can do nothing but good to the cause of conservation.

Sebastian, the Chimpanzee lent by Capt. Sir Malin Sorsbie, never fails to attract attention to himself by his amusing antics!

19. Roads in the Park have been greatly improved. A development grant of £20,000 which included the purchase of a Caterpillar tractor has been put to the best possible use. The Athi River entrance to Hippo Pools section was given priority.

In addition to the above, a further ten bridges were built on the other roads which have stood up well to the 3,000 cars which on average enter the Park every month.

## **MOUNTAIN NATIONAL PARKS**

20. The Aberdare Park can be considered to have had a successful year, in spite of having to be closed on account of rain for long periods. Marsabit Mountain has been closed throughout the year due to Shifta activities.

There is a great need for an all-weather road to be constructed across the Aberdare Park and it is hoped that funds will be made available in next year's Development Plan for this to be done. Largely as a result of rain, particularly on the western side of the Aberdares, fewer visitors entered the Park than last year. However, due to the increased number of rooms over 3,000 more people visited "Treetops" than in the previous year.

21. The Ranger Field Force have been very busy throughout the period on anti-poaching patrols and in conjunction with the Game Department and C.I.D., combating the rising menace of the poacher. Much success has been achieved and many people convicted.

22. Normal maintenance has been carried out on the existing roads and the Naro Moru track has been lengthened and improved. Ten miles of track 9 has been cleared on either side of the road and

this has resulted in the anticipated attraction of many animals to the roadside. It is now not uncommon to see bushbuck, colobus and sykes monkeys and buffalo whilst driving through the Aberdare forest.

23. Early in the year, the Warden's headquarters in Nyeri was moved to a far better site near Mweiga. The new site consisting of ten acres of land with a large house is in every way better than the plot in Nyeri.

24. The West Gate in the Aberdare Park was reconstructed a quarter of a mile above the original site and in a better position altogether. Apart from the Gate, buildings consist of a ticket office and Rangers' quarters.

### **LAKE NAKURU NATIONAL PARK**

25. A full survey of the northern part of the Lake was completed and agreed to by all concerned, but the area was not gazetted during the period as a National Park. It is hoped that this can be done early next year so that planned development can proceed.

However, a track has been constructed which runs down the western shore of the Lake to the Makalia river on the southern end. The area in the South is particularly good for viewing the famous flamingoes.

### **TSAVO NATIONAL PARK**

26. Both sections of the Tsavo Park have had a satisfactory year and the number of visitors has increased by over 7,000 above the previous year's total. The new tarmac trunk road from Mombasa to Voi has encouraged more people to visit the Park from the Coast and this is likely to increase still more when the tarmac reaches Mtito Andei. More people are also using the road from Malindi, which enters the Tsavo East Park at Sala, and which has been brought up to a reasonable standard by the Kilifi County Council.

27. Kilaguni Lodge has been as popular as ever with a record number of visitors. Owing to the poor long rains, the concentration of game on permanent water was earlier than usual, and the rain in the Kilaguni area was so light that herds of elephant and many other animals drank daily in front of the Lodge to the great delight of the visitors.

28. One of the most important developments in the Tsavo West during the year was the work done on the Kyulu Hills road which eventually will link Amboseli with Kilaguni. About 40 miles of this road was constructed and when completed will be a great tourist asset. However, this project is likely to be ruined by the presence on the hills of numerous illegal residents mostly from the Machakos District.

29. There has been no further development in the Murka area. A good Lodge site has been selected near Loosioto Hill and it is thought that this area could be most favourably developed given the necessary finance.

30. Aruba Lodge in the East Tsavo Park, has increased in popularity and was slightly enlarged during the year.

31. A new road was built from Mtito Andei station to Kitani ya Ndundu on the Athi river. This road provides access to the tourist camp which has been set up on the north bank of the river.

32. The Field Force was re-equipped and has operated regularly in both Tsavo East and West Parks with considerable success in combating poaching in both areas. They have been helped a great deal by the use of the Super Cub aircraft.

### **FORT JESUS AND GEDI NATIONAL PARKS**

33. The total number of visitors to Fort Jesus and Gedi increased by 5,600 over the preceding period.

34. Work continued on excavations in Fort Jesus and the most interesting finds during the period were two pigs of lead weighing 140 and 153 pounds respectively believed to be ballast stolen from some ship in the port.

### **ACCOUNTS**

35. Finally, we attach and submit the audited Balance Sheet and Accounts for the year ended 30th June, 1965.

M. HYDER

*Chairman.*

KENYA NATIONAL PARKS TRUSTEES

Nairobi,

December, 1965.

APPENDIX I

NUMBER OF VISITORS

	<i>July 1961</i> <i>June 1962</i>	<i>July 1962</i> <i>June 1963</i>	<i>July 1963</i> <i>June 1964</i>	<i>July 1964</i> <i>June 1965</i>

**AUDITORS' REPORT**

We have examined the above Balance Sheet with the books and vouchers of the Kenya National Parks and we have obtained all the information and explanations we have required. The Balance Sheet is, in our opinion, properly drawn up to show a true and correct view of the state of affairs at 30th June, 1965 of the Kenya National Parks according to the best of our information and the explanations given to us, and as shown by the books produced to us.
